

A BETTER BLUE FOAM

*A Tip published in the July 2004 Issue of the Windy Sock, the Newsletter of the Alamo Escadrille, Joe Joseph,
Editor*

Carpet cleaning firms make a practice of putting small squares of blue foam under furniture legs to prevent staining as the carpet dries out. This stuff is of the same color as the material carried by building supply houses, but it is of finer texture. This makes it better suited for the small carving jobs such as pilot figures and wheel pants and such. Carves and sands very nicely.
